

# uDistribute

Your PeopleSoft Report Distribution Tool

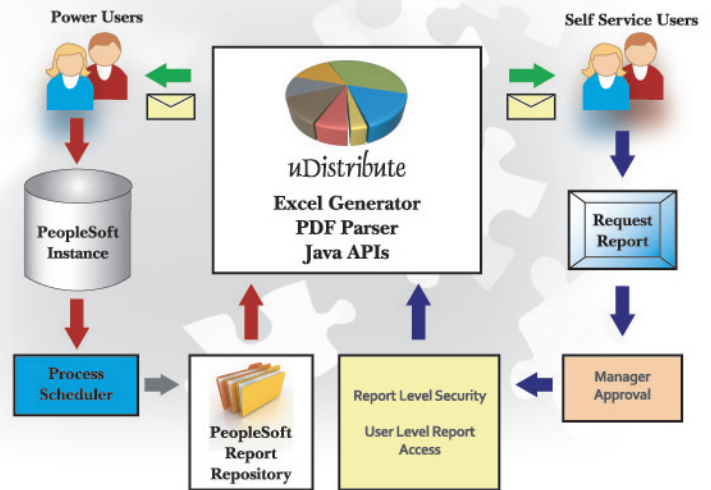

Reports can be generated more cost effectively and efficiently by the tool which satisfies all your business requirements. uDistribute analyzes self service user requests, parses standard PeopleSoft report output into pieces of smaller reports and emails it to the requested user.

The tool also sends email notifications at various stages of the report requests, approvals and distribution.

## Features

- PeopleSoft bolt-on application
- Java/SQR/PeopleTools integrated solution for report distribution
- Quickly and easily generate reports in PDF, .TXT, .CSV (XLS) formats
- Parses SQR output into user defined file type
- Security based online report access
- Automatically sends an e-mail attachment or print and fax reports
- Maintain report notification lists and user security access

## Architecture

## Benefits

- The familiar web based interface is extremely easy to use
- Manage reports based information efficiently saving time and resources, and controlling costs
- Ability to route and print reports to printers at various destinations (leverage electronic copy distribution where ever possible)
- Maintains the log of report notifications, access and archived reports for future reference
